

DRIVING BUSINESS SUSTAINABILITY THROUGH ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG)

5 Days of Training Over 5 Weeks | Face-to-Face and Virtual Lead Training (vILT) Delivery

OVERVIEW

Are you struggling to balance profit versus business growth and sustainability?

Are you ready to lead the change towards a sustainable future while boosting your business's competitive edge?

The growing impact of climate change and the responsibility to address this global crisis has firmly captured the attention of governments, regulators, corporate leaders, and society at large. New legislation and reporting standards for a sustainable future are driving businesses to adapt and evolve

WHY OUR PROGRAMME?

This course will benefit you (and your organisation) by empowering you to:

BE COMPLIANT

Apply best practices in climate reporting

GET RECOGNITION

Add a Climate Licence to your designation profile

ACT ETHICALLY

Executives are called to understand the nature of climate problems, constraints and possible solutions

SHOW COMMITMENT TO A JUST TRANSACTION

Understand and apply the Just Transaction Framework

SECURE FUNDING

Sustain and increase your business's investment opportunities by addressing and reporting correctly on environmental issues

ENSURE LONGEVITY

Understand your contribution to social, business and environmental health determinants

SUSTAIN A GREEN REPUTATION

Protect your business against accusations of greenwashing and the potential reputational risk of climate change, tied to changing customer, investor and community perceptions

UNDERSTAND ECONOMIC IMPACT

Consider the impact on profit, taxation and the dramatic effects on South African economic systems due to the commitment of the Presidential Climate Commission

STAY COMPETITIVE

Lead the way with specialising in Climate Control and equip yourself to take your company forward in a net-zero world

PROGRAMME DETAILS:

- 5 days of training over 5 weeks
- Face-to-face/virtual Instructor Lead Training (vILT) delivery

PROGRAMME DESIGN AND LEARNING OUTCOMES

Block 1: Climate change and the economy

- Understanding the nature and context of ESG within the country and globally
- Identify 'climate change' and 'global warming' and the factors that are believed to cause these trends
- Recognise the potential economic impacts of climate change
- Explain 'net-zero' conceptually, its economics and related organisational pursuit thereof

Block 2: Climate Governance

- Understand the principle of 'Inclusive Capitalism'
- Discuss effective and ethical leadership
- Explain tools used for engaging the board and executive team in accounting for sustainability
- Analyse the impact of climate change on strategic initiatives
- Understand the legal and regulatory influences, including the Draft Bill on Climate Change
- Explain business resilience, consideration, and action plans to accommodate climate change

Block 3: Risk Management

- Identify and assess the enterprise-wide risks associated with climate change
- Evaluate financial risks associated with climate change
- Do scenario analysis
- Develop mitigation strategies
- The 'Green Swan': an introduction to climate change science

Block 4: Climate Reporting and Disclosures

- Understand how companies supplement their traditional financial statements with non-financial analysis disclosures that highlight ESG issues
- Identify the potential benefits of strong sustainability reporting practices, and the potential pitfalls of 'greenwashing'
- Explain disclosure practices that are consistent with leading sustainability reporting frameworks

Block 5: Climate Change and People Perspective

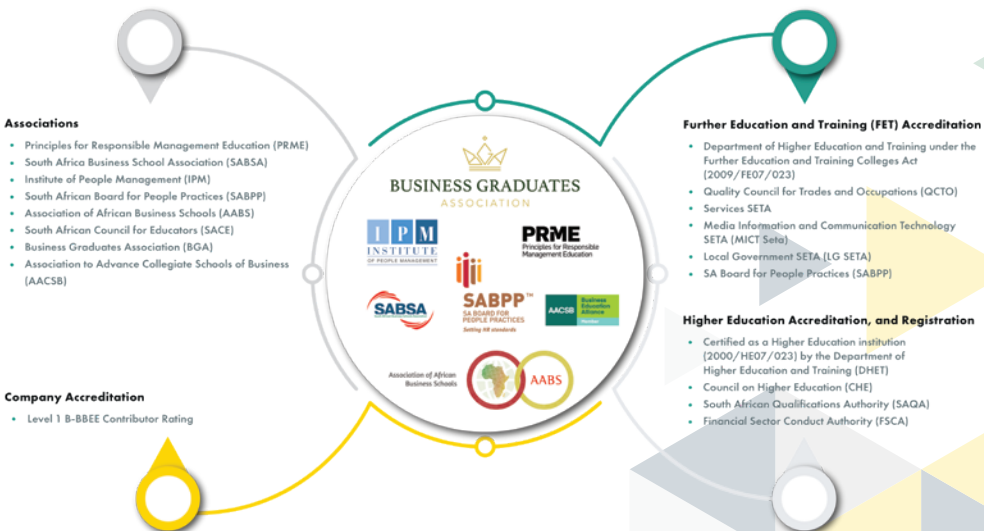

- Understand how the 'People Perspective' brings together the workforce considerations that impact all ESG strategies, from Diversity and Inclusion to greening your employment contracts

ACCREDITATIONS AND ASSOCIATIONS
